Introduction

This document contains the formatting and values for an ISB code list standard. This code list is referenced in an approved ISB Business Data Standard.

Business context

The remit of the Information Standards Board for Education Skills and Children's Services (ESCS) is to develop, approve and promulgate a minimum but sufficient set of data and information standards to support system interoperability across ESCS.

The ISB develops and maintains Business Data Standards which provide a technology independent message specification that can be used by projects, programmes and software vendors to develop consistent, interoperable technical standards. These Business Data Standards are granular 'lego bricks' made up of entities and their attributes extracted from ESCS Enterprise Data Architecture.

The Business Data Standards are supported by a set of code lists which provide a set of approved formatting and values to be used across ESCS. These are also independent ISB Standards in their own right.

Maintenance

This code list will be updated by the Information Standards Board via recommendations from the Department for Children, Schools and Families, Data Services Group, Department for Business Innovations Skills, Learning and Skills Council or Higher Education Statistics for FE and HE as the owners of the list, on a 3 year basis or following requests for change.

Code List Description
