Licence and IPR Statement

Use of Crown copyright material © Crown copyright 2009

The Information Standards Board (ISB) is an internal advisory body to the Department for Children, Schools and Families (DCSF) and the Department for Business, Innovation and Skills (BIS) which are Crown bodies. The information we produce is subject to Crown copyright, which is administered by the Office of Public Sector Information. Unless otherwise stated on individual documents or pages, the following copyright statement applies to material found on this site.

Authorisation to reproduce any information in this standard which is identified as being the copyright of a third party must be obtained from the copyright holders concerned.

Research and private study

The Crown copyright protected information in this standard may be reproduced free of charge in any format or medium in order to carry out research for non-commercial purposes, for private study or for internal circulation within an organisation. This is subject to the material being reproduced accurately and not used in a misleading context. The material must be acknowledged as Crown copyright and you must give the title of the source document/publication.

Licences

Copying Crown copyright protected material for re-use, distribution or publication, requires a licence. You can apply for a Click-Use licence online, by email or by writing to:

Introduction

This document contains the formatting and values for an ISB code list standard. This code list is referenced in an approved ISB Business Data Standard.

Business context

The remit of the Information Standards Board for Education Skills and Children's Services (ESCS) is to develop, approve and promulgate a minimum but sufficient set of data and information standards to support system interoperability across ESCS.

The ISB develops and maintains Business Data Standards which provide a technology independent message specification that can be used by projects, programmes and software vendors to develop consistent, interoperable technical standards. These Business Data Standards are granular 'lego bricks' made up of entities and their attributes extracted from ESCS Enterprise Data Architecture.

The Business Data Standards are supported by a set of code lists which provide a set of approved formatting and values to be used across ESCS. These are also independent ISB Standards in their own right.

Maintenance

This code list will be updated by the Information Standards Board via recommendations from the Department for Children, Schools and Families, Data Services Group, Department for Business Innovations Skills, Learning and Skills Council or Higher Education Statistics on a 3 year basis or following requests for change.

Code List Description

Code List Name: Absence Authorisation Type
